Superior, Wisconsin

UMD Student

Major: Computer Science
Minor: Music, Computer Engineering

IT Intern

Exodus Global
May 2023- Present

Car Detailer

Self-Employed
Sep 2021- Present

Sales Associate

Nummi Jewelers
Nov 2019-Sep 2023

Charter Organization Representative

Scouts BSA
Sep 2022-Apr 2023

Who am I?

Hey, my name is Kyle Granquist, and I enjoy clicking away at my computer developing software that will one day impact the lives of many. I enjoy serving others and playing a role in a bigger purpose. My character, experience, and enthusiasm for computer science will serve future co-workers, and teams I am a part of.

HOW I CAN ADD VALUE

I am passionate about learning to utilize evolving technology and empowering others to do the same. Through my roles I'm always trying to find a way to improve the status quo. I do this through well-organized research, and testing of new methods, products, and tools, which improve the result for my customer and beneficiaries. I have become proficient with analyzing and solving problems with user interfaces through years of research, work experience, and organized courses.

Currently I am studying to become an expert in computer science through classes taken at the University of Minnesota-Duluth. I'm proficient in C++, and Microsoft Azure and have working knowledge of Swift, JavaScript, SQL queries. I have also learned how to serve others well through my work as an IT Intern, as every employee is in a unique situation, and through my experiences volunteering.

Skills

- Through Exodus Global, I spent time creating custom fillable PDFs with JavaScript for service engineers to use in the field.
 - Successfully troubleshooting printer and computer problems associated with business-critical systems.
 - Communication skills that have accelerated my ability to solve problems quickly, while working with people.
 - Assess needs to provide the best customer experience. Continually striving to not only meet, but exceed, customer expectations in multiple different industries and positions.
 - Time management skills and a passion to serve others.
 - Accelerated sales by producing online marketing content through product photography.
 - Skilled in building and maintaining relationships with customers. The trust factor gives customers comfort when letting me personally repair items of significant sentimental and financial value.
 - I relate to people from all walks of life, I am flexible, and serve in a variety of capacities depending on the need and role.
 - As a musician, I've successfully preformed in ensembles and as a soloist. As a soloist I've competed at the state level three years and received gold recognition. Working in ensembles require precise communication and collaboration and working as a soloist requires intrinsic motivation and drive.
 - Initiation, planning, and execution of projects of varying scope for both for-profit and charity. Benefits provided to the community include an engineered handicapped accessible walking bridge and trail grooming and maintenance.
 - In my personal and professional life, I welcome constructive feedback from others, understanding that it is key to improving my performance.
-

Achievements:

Certificates:

- ConnectWise Cybersecurity Fundamentals for Engineers, July 2023

High School:

- Northwestern High School, Summa Cum Laude, Sep 2018 – May 2022
- National Honor Society

Scouts BSA:

- Eagle Scout - Scouts BSA-Troop 212, Apr 2019
-
